- Screen sizes from 15 to 28 inches
- Standard and widescreen aspect ratios
- Integrated speakers
- Integrated USB ports
- Stylish, slim bezels*

ViewSonic Technology Innovations* and why they matter

- **OptiColor™** NTSC color as high as 118% color saturation for richer, more vibrant and precise colors
- **Dynamic Contrast Ratio** as high as 12,000:1 for deeper black levels and a superior front-of-screen performance
- **Video response** as fast as 2ms for blur-free, images. Ideal for CAD/CAM applications, video editing, movies and gaming
- **Super-HD resolution** enables high definition content to be displayed on your display for a truly superior desktop experience
- **SuperClear™** panels that enhance image brightness and clarity. The ultra-smooth screen surface sharpens images and adds brilliance.
- **Full ergonomic** height, tilt, swivel and pivot adjustments reduce eyestrain, back and neck strain and leads to improved productivity. The swivel function makes it easier to collaborate with co-workers.
- **PerfectSuite™ Plus** screen control and asset management software** eases color calibration, screen management and allows for asset management and theft deterrence

Why ViewSonic® LCDs
