

Information is power. Only if you can find it.

HP Flow CM Professional

An easy-to-use, cloud-based solution, HP Flow CM Professional is designed to help your small to mid-sized business manage and more securely store and access information for improved collaboration.

Manage your content and improve office collaboration

HP Flow CM Professional provides access from virtually anywhere to a complete set of proven document management tools so you can capture, store, search, retrieve, and share information more efficiently. With HP Flow CM Professional you can:

- Streamline workflows and collaborate more productively with convenient sharing and notification tools.
- Replace your filing cabinet—make paper and digital files more accessible with cloud-based document management.
- Capture a document by snapping a picture—HP Image Enhancement Technology automatically improves the image.

Even more, you can rely on a solution built and tested by Autonomy, an HP company and an industry pioneer in Enterprise Content Management systems.

Access your files anywhere, anytime¹

Enhance productivity with access to files at home, in the office, or on the go. Using your desktop or mobile device, you can:

- Manage documents directly from your home or office desktop, and get full access from a web browser.
- Quickly store, search, and retrieve information across more than 1,000 file formats, including PDF, XLS, SML, RTF, and TIFF.
- Capture, store, view, share, and print documents on the go from your mobile device, using an iOS app or supported web browser.²

- Synchronize content across all of your devices automatically, using the HP Flow Sync tool. Files you edit offline are updated the next time you connect.

Plus, you can capture files using practically any MFP or scanning device. For a fully integrated experience, access your digital filing cabinet using HP LaserJet Flow MFPs to scan, store, search, retrieve, and print right from the device.

Count on a trusted IT leader with your content

With HP Flow CM Professional you can upload, store, and access documents without worry.

- HP employs bank-grade, 256-bit AES encryption for data transfer, and highly protected data centers that help meet ISO, SAS70, SSAE16, SOC1, and SOC2 audited environments.
- Enhance security and help prevent unauthorized access to your documents, using password protection.
- Know who's accessed and modified any of your documents—from creation to deletion—with a full audit trail, which helps achieve compliance requirements.

Take your business into the cloud—without turbulence

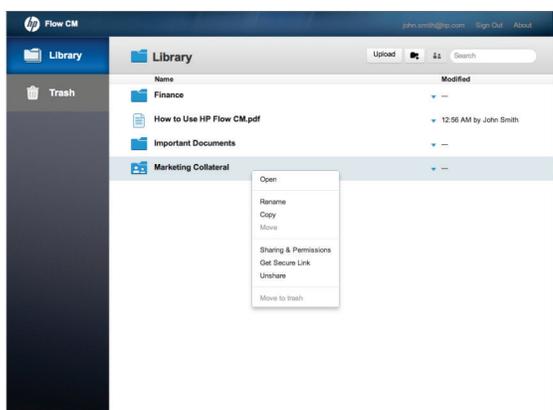

When you use HP Flow CM Professional, you get first-rate cloud storage without the costly commitment of new hardware, software, or IT staff. And, you pay only for the features you need now with the ability to scale up at a moment's notice. Moreover, you can count on a seamless solution that comes with support from certified HP Document Solutions Specialists.
