

# COHESITY

## Protect all your data sources, simply and at scale

Cohesity DataProtect is a modern, software-defined solution for protecting all your data sources. With a platform built for scale and performance, Cohesity offers:

- Dramatically simplified backups and global management
- Reduced costs
- Policy-driven automation
- Flexible delivery options

The world's largest organizations rely on Cohesity to protect their data and reduce their TCO. Learn how you can benefit from a modern approach at DALY Computers.
